

We're raising £30,000 to fund neurosurgery for Charlie with a specialist neurosurgeon in Barcelona

We are raising £30,000 for neurosurgery for Charlie with a specialist neurosurgeon in Barcelona who is able to treat spine complications of Charlie's rare disease, Classical Ehlers-Danlos Syndrome.

Charlie has Occult Tethered Cord and needs a tethered cord release surgery. This means her spinal cord is inappropriately tethered to the inside of her spinal column causing too much tension in her spine. This is causing progressive nerve damage and putting pressure on her spinal fusion and other unstable areas of her spine. We aim to have the funds as soon as possible so that Charlie can have the surgery in February 2022.

We would be grateful for any help people are able to offer, even just sharing the fundraiser with your friends and family.
